Final P2P (name of file):

More detailed information on press conditions for test located at:

The above information is for use in daily process control:

- If at same density +/- .05 and dot gain is off by more than 4% then press conditions may have changed.
- If ink L*A*B* values are off by 3dE or less at same density then ink may have changed.
- Different papers can change the above values.
- For information on blankets, packing and other press conditions please reference additional paperwork.
